## LOVE and MARRIED LIFE Idah McGlone Gibson

MOTHER LOVE

"How did you know I was going to tall her Mary," I asked Charles as he he came to my room after telephoning John.

"I have heard you tell your mother."

"I have heard you tell your mother."

"The charles I do not for I know the charles I do

ten, on their ability to do team work, and especially on the wife's ability to do team work. No man who isn't a financial gentue, can make any headway against a wife who is wasteful and extravagant and bitten by the manta to live beyond their means. Norman and man succeed who has a new team.

can any man succeed who has a peev-lah, frefful, selfish wife who thinks of nothing but her own pleasure, and who stands in her husband's way by

refusing to go to live in some place where fortune calls him, or who kills his ambitions and paralyzes his en-

ergy by always opposing every nev

ergy by always opposing every new scheme, and throwing a wet blanket over every fresh enterprise.

But when the wife keeps up her end of the game by providing her husband with a comfortable cheery home where he is fitted and corrected and braced up for the next day's fray, when the wife is willing to economize and sacrifice so that the money may go back into the business instead of into fine clothes and automobiles; when she is just as interested in her

when she is just as interested in her husband's affairs as he is, and as keen for success, why that couple can't fail -they are doing too good team work.
And it take team work to make a happy home as well as a prosperous

be came to my room after telephoning John.

Thave heard you tell your mother a thousand times that if you ever had a little baby girl you would name it Mary after her. Charles said nothing more, but his face lighted up, as he came toward my bed and looked down at my baby, fast asleep in the crook of my arm. Truly she was somethins very, very wonderful. Her little rone-leaf cyclids were almost transparent and with a little imagination I could almost see her golden brown cyes behind them. Her tiny mouth kept curing up into those little movements that only a mother describes as smiles ther miniature hand kept reaching out as if Io find me.

"Isn't she beautiful" I asked "Don't you think she is the most beautiful baby you ever saw, Charles?"

Fince Becomes Solemn
Charles smiled indulgently and then his face became rather solemn as he said. "Yea, she is the most beautiful baby I ever saw, dear, because she is yours." Just then the setting sun peeped under the half drawn shade and glinted across my babys head turning the ground a soft brown furst to glinting copper.

"She has hair just like yours, hasn't."

Sattlerine."

Must Have Been Beautiful
No. Charles, I do not, for I know no one in the world, no mother since Eve ever felt the great joy and the great responsibility more more than I do today. If that rave my face a different look, then I must have been beautiful. I don't know how a woman iooks when she has this proud and lines the stamp is prushed away by other thoughts and thoughts stamp in the melves on the human face. Sometimes the stamp is brushed away by other thoughts and sometimes it remains indelibly, as I hope this thought of the glory of motherhood will stay upon mine."

"And you are going to call her Mary." asked Charles fingering a bit of paper somewhan nervously.

"And you are going to call her mary!" asked Charles fingering a bit of paper somewhan revously.

"I do not like two names for a girl, for she will want to add her matten weeks, you know. Besides his mother's mame is the very last that I wo

### ARMS AND THE MAN

# Since Cleopatra's Day the Arm Has Been More Subtle Factor in Feminine Charm Than the Face

FOR LITTLE FOLKS

PHILIP FROG'S TALE

"She has arms that would lure a Caesar to her heart."

So said the French artist Raugereau of Miss Clara Moores, the young stage beauty who is playing the leading role in Col. Henry Savage's Cape Cod comedy success, "Shaving's."

In this summer of short sleeves, when the arms are exposed as much as the face, women are interested in lovely arms. Miss Moores is probably the greatest living authority on the care of the arms and has written three articles on arms, telling how she keeps hers so attractive.

THE FIRST ARTICLE BY CLARA MOORES APPEARS TODAY

By CLARA MOORES. NEW YORK-Most American wom en give too much attention to their faces and too little to the rest of their bodies. They pull and put and name is the very last that I would give my baby." I said decisively.

"She has hair just like yours, hasn't she?" said Charles.

I laughed. "I think she will have hair like mine when she has any Just at present it seems like a soft silken halo of gold, does it not?" I said, mixing my metaphors.

Charles stood quietly watching us my baby and me. "I did not know, he observed, "that you were the Madonns type, Katherine. Whenever I have thought of you as an out-door ways thought of you as an out-door walked miles and swam like a meral ways thought of you as an out-door walked miles and swam like a meral.

There are some names that we associate with people," was my explanation, and John's mother.

"Oh!" was Charles' exclamation, and I knew that he had just realized that lelizabeth was the first name of walked miles and swam like a meral.

Whis Moreland.

There are some names that we associate exclamation, and John's mother.

## HEALTH

BY UNCLE SAM, M. D.

tealth Questions Will Be Answered if Sent to Information Bureau, U. S. Public Health Serv ice, Washington, D. C.

FULL-TIME HEALTH OFFICIALS. During the war and since, with the home-coming of thousands of soldiers, there has been an awakening in various cities, towns, and communities regarding the protection of the public health. The men who were in military service had various opportunities for seeing the effectiveness of sanitation and sanitary methods.

The civilian population in the areas immediately adjacent to the various military encampments witnessed dem-onstrations by the United States public health service in the control and eradication of communicable diseases and insanitary conditions.

The public is beginning to realize that a city, town, or county can be freed of insanitary conditions and preventable diseases if the proper super vision of such matters is maintained by the health authorities.

Proper sewage disposal, clean water safe milk, control of communicable diseases, eradication of flies and mosquitoes, are all possible if the town or community has a competent health organization

A health officer who properly pro tects and safeguards the health of his town, city, or county must devote his whole time to his work. Full-time health officers are necessary for efficient public health work.

But the health officer alone cannot do all the work; he must have a laboratory, public health nurses, sanitary inspectors, and necessary clerical help. The rather working force of any health department, city, town, or county should give their full time to the work
